

# Record Products 2017: Best Architectural Finishes

## Glowing Metals

Chemetal has expanded its existing portfolio with new layered textures, colors, and finishes ranging from Brushed Bronze and Rose Gold to tartan-like grids and painterly dots that evoke Seurat paintings. Meanwhile, new embossed patterns have a geometric bent and a reflective surface composed of thin metal foil bonded with high-pressure laminate—with 75% recycled content—making them greener and more affordable than other decorative sheet metals for interior walls and ceilings.
